

Software Extension File explanation

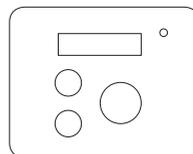

By installing the Software Extension File, the following functions will become usable over **Bluetooth®** with the F8n Pro.

- When connected to a smartphone or tablet, the F8n Pro can be operated from a distance (up to 10 m).
- When connected to a compatible timecode device, timecode received from it can be written to recording files.

Download the Software Extension File from the F8n Pro downloads page on the ZOOM website (zoomcorp.com). Then, follow the instructions in the Software Extension File Installation Guide to install it.

Smartphone/tablet
(Android/iOS/iPadOS)

Supported timecode device

- To remotely control the F8n Pro with a smartphone or tablet, the dedicated F8 Control app (free) is necessary. Download it from the App Store or Google Play Store.
- Resetting the F8n Pro settings to their defaults (Factory Reset) will disable the extension. In this case, install the Software Extension File again.

The F8n Pro has received radio law certification in Japan, the USA, Canada and Europe (EU). This function may not be used in other countries and regions. Using it in countries where certification has not been received could result in legal penalties. Please use caution.
