---

## Version 3.20

- **Released as the following bug fix in May 2022**

1. The built-in tilt indicator does not show correctly when H3-VR is placed on a horizontal surface.

## Version 3.10

- **Released as the following update in April 2022**

1. Updated firmware supports new electronic parts.

## Version 3.00

- **Released as the function update in August 2021**

1. Enables Conference mode when connected to a computer or iOS/iPad device.

This allows use of the product as Ambisonic mic with online video conferencing applications.

## Version 2.10

- **Released as the following bug fix in September 2019**

1. H3-VR cannot connect to iOS devices in iOS 13 / iPadOS 13 via Bluetooth.

## Version 2.00

- **Released as the following function updates and bug fixes in March 2019**

- **Function Updates**

1. Added a function to receive timecode wirelessly from UltraSync BLUE by Timecode Systems and write timecode information to a recording file.

A dedicated wireless adapter connection is required to use this function.

2. Added remote control function when operating as an audio interface.

\*For details please refer to the H3-VR Version 2.00 Supplementary Manual.

- **Bug Fix**

1. H3-VR sometimes freezes when booted or exiting from USB function.

## Version 1.00

- **Released as the mass production in October 2018**
