*1 With some models of Samsung devices it is reported that a noise is heard in the signal when first connected to Am7. To avoid such noise issue, please select "UNPROCESSED" or "DEFAULT" from the AUDIO ROUTING setting in the [MENU] > [OPTIONS] settings of the Handy Recorder app.

*2 When running the Handy Recorder app v3.1 or earlier, the stereo signal from Am7 might be reversed. Please update the Handy Recorder app to the latest version.

*3 In order to use a USB device on OPPO, you need to activate "OTG Connection" from the [Additional Settings] in the [Settings] menu. (Note: OTG connection automatically turn off when not in use for 10 minutes.)
