

Jensen IR Collection For ZOOM Multi-Effect Processors IR Chart

ZOOM, Jensen Speakers, and Overloud have joined forces to create a unique collection of speaker cabinet models, now made available as IR data, for the ZOOM G11, G6 and B6 Multi-Effect Processors. The custom IR's were captured by the Jensen and Overloud teams, and then fine-tuned in collaboration with ZOOM to best fit the tonal response of ZOOM's popular pedalboards.

How to use JENSEN IR COLLECTION

1. Download the IR ZIP folder from the link.
2. Unzip the ZIP.
3. Start Guitar Lab and drag and drop the IR data in the folder to the IR pool of Guitar Lab.
Import of IR data into Guitar Lab is completed.
IR data can be imported into the product itself by dragging and dropping from the IR pool to the IR slot of the product.
