---

## Version 2.10

- **Released as following bug fixes in September 2019**

1. F8n cannot connect to iOS devices in iOS 13 / iPadOS 13 via Bluetooth.
2. Noise is heard after FRC-8 is disconnected.

## Version 2.00

- **Released as following bug fix and function update in June 2019**

- **Function Update**

1. Added a function to receive timecode over Bluetooth LE from UltraSync BLUE by Timecode Systems and write timecode information to a recording file.  
Installation of the software extension file is required to use Bluetooth LE function.

- **Bug Fix**

1. The time reference of recorded files is slightly shifted when the frame rate for timecode is set to 29.97D.

## Version 1.20

- **Released as following bug fixes in November 2018**

1. Metadata included in WAV files partially cannot be loaded by "Avid Media Composer" application.
2. Files may sometimes be overwritten in recording when "No" is selected on the "Reset Take Number" screen.

## Version 1.10

- **Released as following bug fix and function update in July 2018**

1. When renaming files on SD slot 1 and SD slot 2 at the same time, an error occurs if one of the files is Mono / Stereo WAV.
2. Changed the name "Input Level" of PFL menu to "Trim".

## Version 1.00

- **Released as mass production in June 2018**
