Introduction

■ Items to prepare

M3

Windows or macOS computer
with Internet access

USB Cable
(USB Type-C)

■ Firmware update process

1. Download the firmware update file.
2. Extract the ZIP file.
3. Update the firmware.
4. Confirm that the firmware has been updated correctly.

This guide explains updating the firmware to version 1.10 as an example.

On Windows

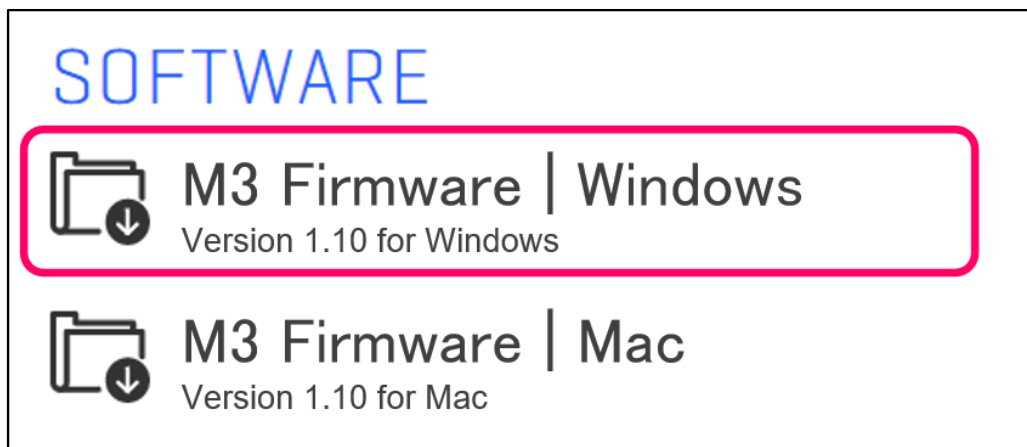

Precautions

1. Log in to your computer using an account with administrator privileges.
2. Before starting this application, shut down all other applications that are running.

In addition, if any MIDI or audio devices are connected by USB cable to the computer you are using, disconnect them all.

Installing the firmware update file

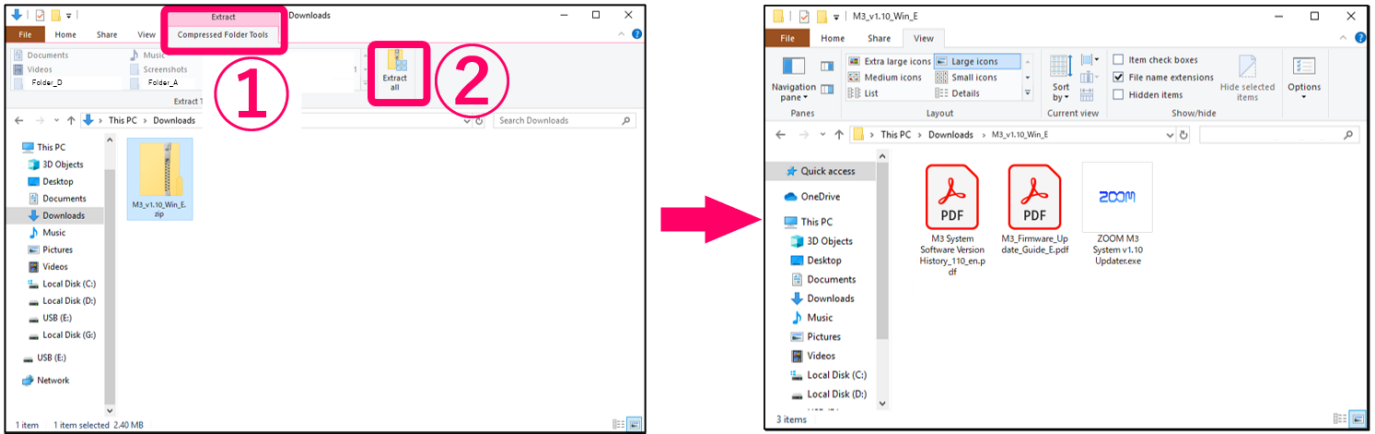

1. Download the firmware update file.
Installing the firmware update application for windows.
Download the ZIP file containing the firmware update application from M3 download page.

Extracting zip files

1. Extract the ZIP file.

Select the folder that contains the downloaded ZIP file. Click ① “Compressed Folder Tools” followed by ② “Extract all”. This extracts the ZIP file.

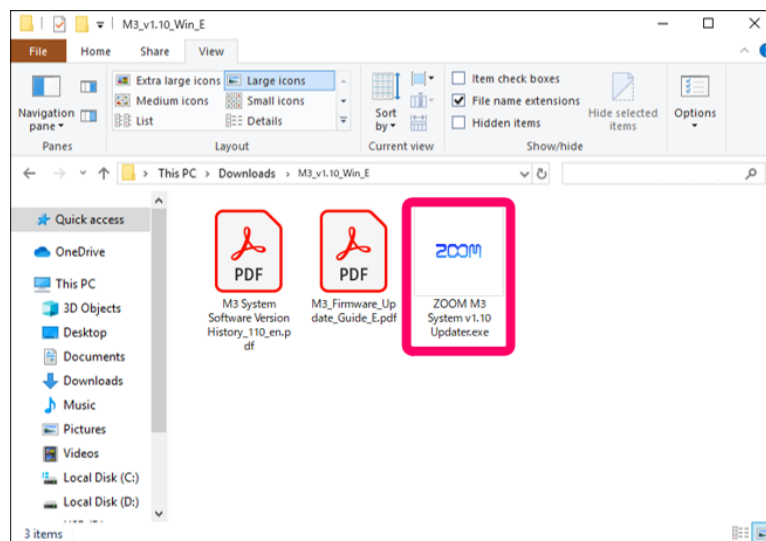

Updating the firmware

1. Connect the M3 and the computer using a USB cable. Then, turn the M3 power on.

2. Double-click the firmware update application icon to launch it.

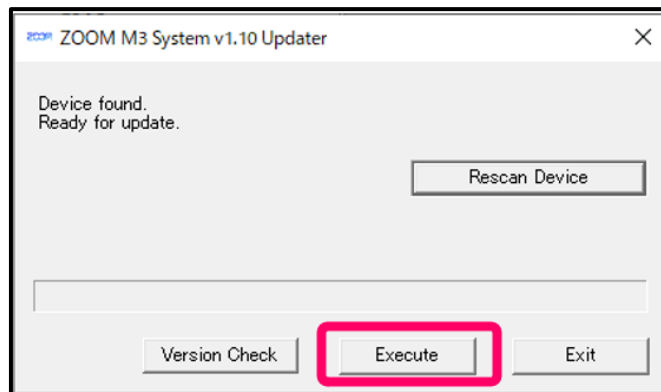

- 3.** Confirm that “Device found. Ready for update.” is being shown.
If it is not, click “Rescan Device”.

- 4.** Click the “Version Check” to check the firmware version.

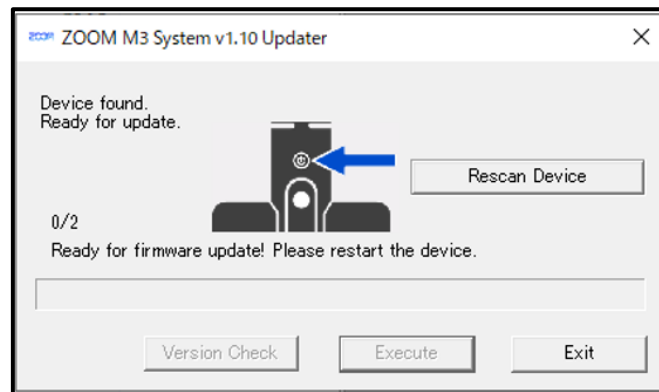

- 5.** Click the “Execute” to start the firmware update.

6. When preparation for the firmware update completes the following will appear.

The firmware update will start when the M3 power is turned on again.

7. The progress of the firmware update appears as a bar like this.

NOTE

Do not turn the power off or disconnect the USB cable while the firmware is being updated.

In the unlikely event that a firmware update should fail, conduct the procedures from the beginning to update the firmware again.

8. When the firmware update completes, it will appear as follows.

Confirm that “Version update completed.” is being shown.

- Click the “Exit” to close the firmware update application.

- Turn the M3 power off.
This completes the firmware update.

Checking the firmware version

- Connect the M3 and the computer using a USB cable. Then, turn the M3 power on.
- Double-click the firmware update application icon to launch it.
- Confirm that “Device found. Ready for update.” is being shown.
If it is not, click “Rescan Device”.
- Click the “Version Check” to check the firmware version.
- Check the firmware versions.

On Mac

Precautions

1. Log in to your Mac computer using an account with administrator privileges.
2. Before starting this application, shut down all other applications that are running.
In addition, if any MIDI or audio devices are connected by USB cable to the computer you are using, disconnect them all.

Installing the firmware update file

1. Download the firmware update file.
Download the ZIP file containing the firmware update application from M3 download page.

Extracting zip files

1. Opening the folder.
After downloading, click ① "Downloads", which appears at the bottom of the screen by default. Then, click ②. This will open the downloaded folder.

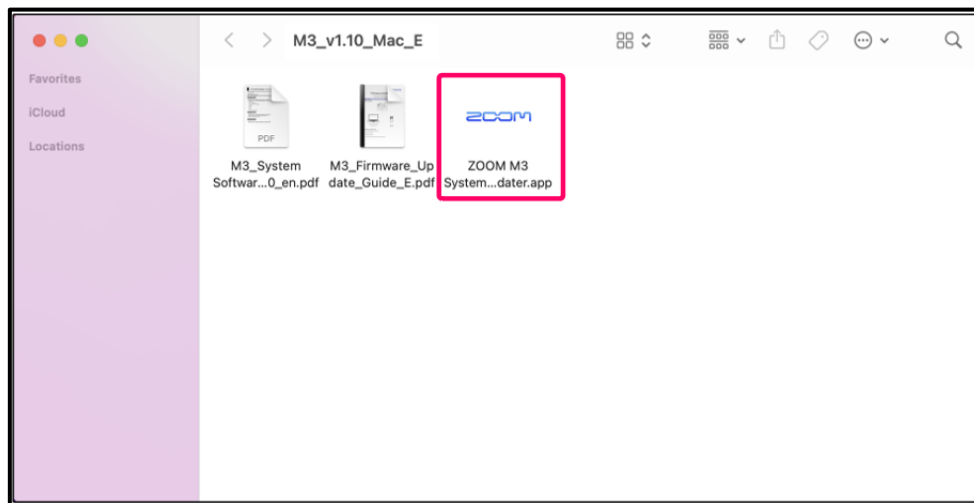

Updating the firmware

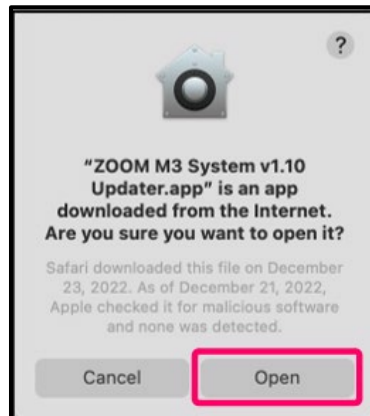

1. Connect the M3 and the Mac using a USB cable. Then, turn the M3 power on.

2. Double-click the firmware update application icon to launch it.

3. Click "Open".

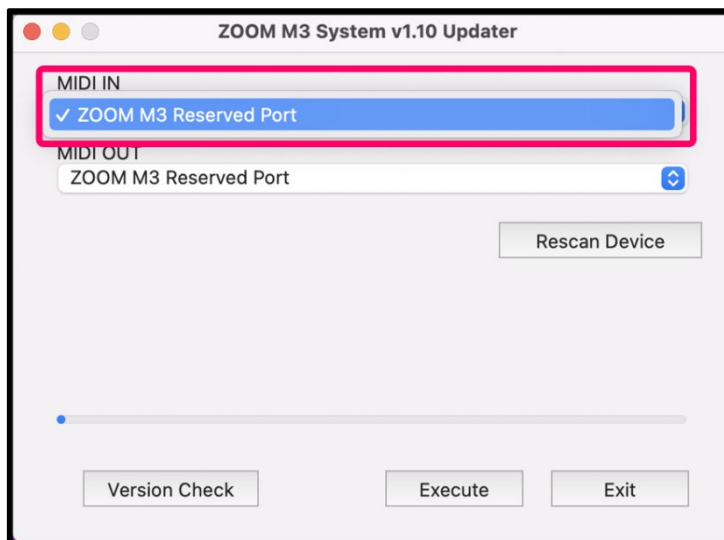

4. After launching, a window that looks like this appears.

5. In both the “Input Device” and “Output Device” fields, click the field to open a list of MIDI devices and select “ZOOM M3 Reserved Port”.

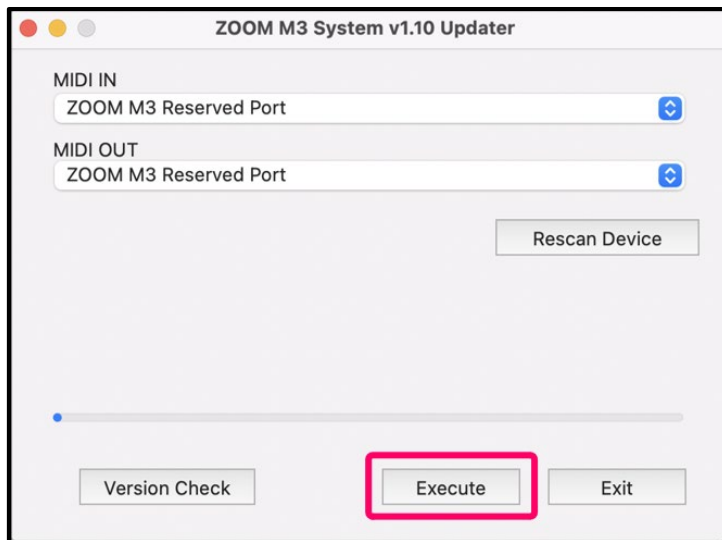

If nothing is shown in the fields, click “Rescan Device”.

6. Click the “Version Check” to check the firmware version.

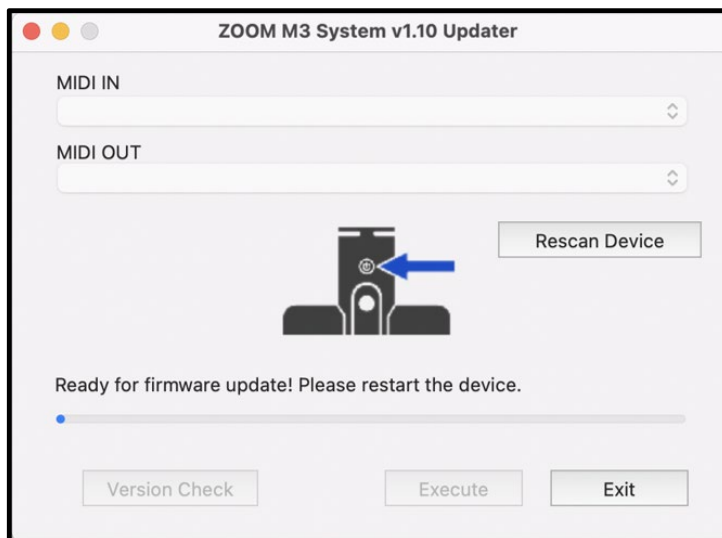

7. Click the “Execute” to start the firmware update.

8. When preparation for the firmware update completes the following will appear.

The firmware update will start when the M3 power is turned on again.

9. The progress of the firmware update appears as a bar like this.

NOTE

Do not turn the power off or disconnect the USB cable while the firmware is being updated.

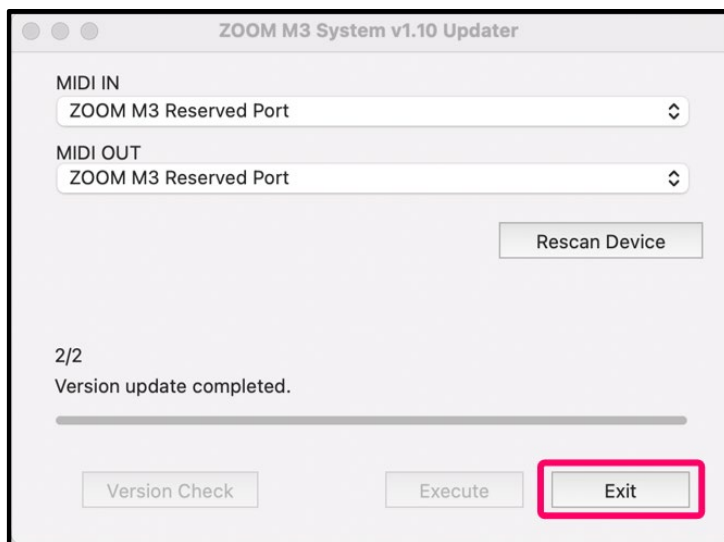

In the unlikely event that a firmware update should fail, conduct the procedures from the beginning to update the firmware again.

10. When the firmware update completes, it will appear as follows.

Confirm that “Version update completed.” is being shown.

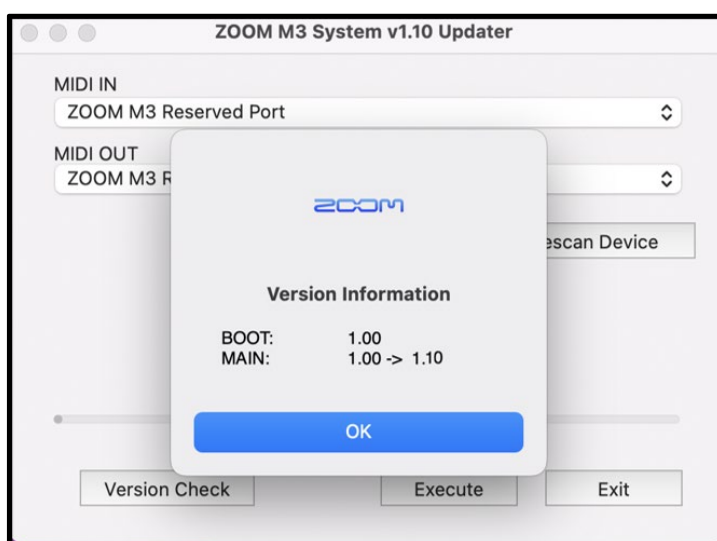

11. Click “Exit” to close the firmware update application.

12. Turn the M3 power off.
This completes the firmware update.

Checking the firmware version

1. Connect the M3 and the Mac using a USB cable. Then, turn the M3 power on.
2. Double-click the firmware update application icon to launch it.
3. In both the “Input Device” and “Output Device” fields, click the field to open a list of MIDI devices and select “ZOOM M3 Reserved Port”.
