USB file transfer	By connecting with a computer, data on the microSD card can be checked and copied.
Online help (2D code)	Detailed documents related to the product can be viewed by reading the 2D code with a smartphone.

Troubleshooting

Sound is not output or the volume is very low

- Check the headphone connection.
- Confirm that the headphone volume is not lowered.
- Check the orientation of the mic or the volume settings of the connected equipment.

Monitored sound is distorted

- Adjust the volume.

Built-in mic sound is distorted

- Use the R4 farther away from the sound source.

INPUT A/B sound is distorted

- Adjust the volumes of connected devices.

Recording is not possible

- Confirm that the microSD card has open space.
- Confirm that a microSD card is loaded properly in the card slot.

The recorded sound breaks up

- Test the microSD card.
See the Operation Manual for details.
- Use the R4 to format the microSD card.
- We recommend using microSD cards that have been confirmed to operate with this recorder.
See the ZOOM website (zoomcorp.com) for information about microSD cards that have been confirmed to work with this unit.

Not recognized by computer when connected

- Use a USB cable that supports data transfer.

Date and time are frequently reset

- If power is not supplied by an AC adapter or batteries for a long time, date and time settings will be reset.
If the Set Date/Time Screen appears during startup, set them again.
