Version 2.10

· **Release to fix the following issues in January 2026**
1. Freezing could occur if the unit firmware was version 2.00, but the accessibility file was older than version 2.00.
2. When loud sounds were input, sounds output from the PHONE/LINE OUT jack would clip easily.

Version 2.00

· **Release to add the following functions and fix the following issues in November 2025**
■ Added functions
1. Input gain setting function.
2. AI Noise Reduction function to analyze and reduce environmental sounds and other noise.
3. Functions to record and play MP3 files.
4. Function to export files in MP3 format.
■ Fixed issues
1. Minor issues fixed.

Version 1.20

· **Release to add the following function and fix the following issues in April 2024**
■ Added function
1. A shortcut function to switch on/off the guide sound has been added.
■ Fixed issues
1. After multiple files were created while recording for a long time, normalization and export would only be possible for the last file.
2. Sometimes exported files would not open properly depending on the DAW or other application used.
3. Other minor issues have been fixed.

Version 1.10

· **Release to fix the following issues in February 2024**
1. If the remaining battery charge was low, the unit might freeze during startup on rare occasions.
2. The remaining battery charge would not be shown accurately during USB mic use or USB file transfer.
3. Issues related to audio guide pronunciation have been fixed.
4. Other minor issues have been fixed.

Version 1.04

· **Released as mass production in February 2024**
