

USB mics confirmed to work with the P2

USB microphones not listed below can be used with the P2, but please note the following.

- Microphones with high power consumption, such as those with RGB lighting functions, may not be usable. (See note below.)
- The degree of volume change when the P2's INPUT VOLUME knob is operated varies depending on the microphone.
- If a microphone is equipped with special functions, these functions may not be available.

Note: P2 will stop operating if the current consumption of the two connected USB microphones exceeds 700mA.

Brand	Model name	Remarks
AKG	LYRA	The level will rise to the maximum once when the P2 INPUT LEVEL knob is turned to around 8 – 9 o'clock.
Audio Technica	AT2020USBX	
Audio Technica	AT2040USB
