H6essential Handy Recorder System Software Version History

You can always download the latest system software for free on the web site shown below.

https://zoomcorp.com/

Version 4.00

・Release to add the following function and fix the following issue in November 2026

■ Added function

1. MTR mode function added to enable use as a multitrack recorder.

■ Fixed issue

1. When the level of the stereo mix track was higher than 0 dB, the level meters on the Mixer Screen would wrongly be shown as hitting maximum.

Version 3.30

・ Release to add the following function in April 2026

1. The TCA-1 timecode adapter is now supported.

Version 3.02

・ Release to add the following features in November 2025

1. Input gain setting function
2. AI Noise Reduction function to analyze and reduce environmental sounds and other noise.
3. Functions to record and play MP3 files.
4. Function to export files in MP3 format.
5. Setting to disable mix file recording.
6. Support for the ZOOM Handy Control & Sync controller application.

Version 2.10

・ Release to fix the following issues in May 2025

1. Even when fps was set by an UltraSync Blue, it was not applied to the H6essential and proper synchronization was not possible.
2. Other minor issues.

Version 2.02

・ Release to add the following functions and fix the following issues in August 2024

■ Functions added

1. Support for two types of mic capsules.
   SSH-6e Shotgun Mic Capsule
   EXH-6e Dual XLR/TRS Input Capsule
2. A function that pauses recording has been added.

■ Issues fixed

1. The mid-side stereo setting was not always applied to the monitoring sound.
2. The message “INPUT 1 (2/3/4) OVERLOAD!” was not shown sometimes.
3. Other minor issues have been fixed.
