ZOOM®

G1 FOUR/G1X FOUR B1 FOUR/B1X FOUR

Version 2.0 Supplementary Manual

The following functions have been added and changed in firmware version 2.0.

Changing the looper position

The looper can now be placed either before or after the effect. By changing the looper position to before the effect, the looped sound of a performance can be used to craft the sound without continuing to play.

1. **Activate the looper.**

• Press ⟳ LOOPER

Return to previous mode: Press ⟳ LOOPER

2. **Change the looper position.**

• Turn ³◯ Hi

```
           LOOPER
  Time  StopMode POSI VOL
   ♩x2   Finish  Pre  80
```

Setting	Explanation
Pre	The looper is positioned before the effects.
Post	The looper is positioned after the effects.

> **NOTE**
> Changing the recording time, loop or position or tempo will clear any loop that has been recorded.
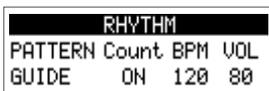

> **HINT**
> The tempo (BPM) setting available up to firmware version 1.1 can be changed using the rhythm or from SETTING > SETUP.

Setting value display during rhythm playback

Rhythm settings can now also be checked during rhythm playback.
