

B6

Multi-Effects Processor

Quick Tour

You must read the Usage and Safety Precautions before use.

The Operation Manual can be downloaded from the ZOOM website (www.zoom.jp/docs/b6).

This page has files in PDF and HTML formats.

The PDF file format is suitable for printing on paper and reading on a computer.

The HTML format can be read with web browsers and is designed for reading on smartphones and tablets.

Turning the power on

By default, ECO mode is set to ON, so the power will automatically turn off if no use occurs for 10 hours. ECO mode can also be turned OFF.

Making connections

Impedance switches

10M

1M

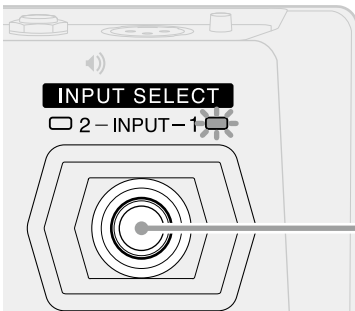

Use with ordinary electric basses

10M

1M

Use with acoustic basses that have piezo pickups

2

Select the input channel to use.

Tuning

1 Press and hold to activate the tuner. Press again to deactivate the tuner.

- Play the open string that you want to tune.
- The nearest note name and pitch detuning will be shown.
- Tune the string so that ► ◀ lights green.

Bypassing

Adjusting the EQ and volume of a bass amp, for example, is easier if the B6 effects are bypassed.

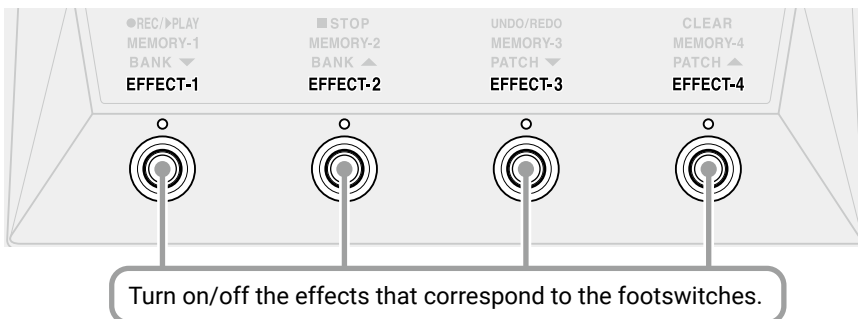

EFX BYPASS	This bypasses the effects section. (Only the DI section is used.)
ALL BYPASS	This bypasses everything.
Unlit	This bypasses nothing.

Selecting a PLAY MODE for the play style

The touchscreen and footswitch functions change according to the selected play mode.

EFFECT BOARD

This shows the effects and amp model used in the patch memory. Effects can be turned on/off with the footswitches.

- Tap ▼ ▲ to select patch memories.
- Tap a footswitch icon and then tap an effect icon to assign or unassign that effect to that footswitch.

■ Changing effect settings

Open the menu and tap the icons to change various settings.

Swipe up to close the menu.

Swipe left and right to change menu pages.

■ Adjusting effect parameters

Adjustable parameters and current settings

Tap < BACK to return to the previous screen.

Reordering effects

Adding effects

Deleting effects

Replacing effects

If an effect is selected that would cause the processor to exceed 100%, the effect will not be selected and the following message will appear before the previous screen reopens.

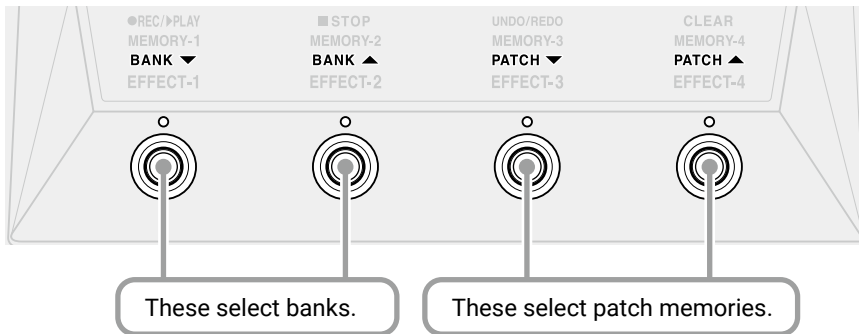

BANK/PATCH

Footswitches can be used to select patch memories with saved effect and amp model parameters and on/off settings.

Banks are groups of 4 patch memories.

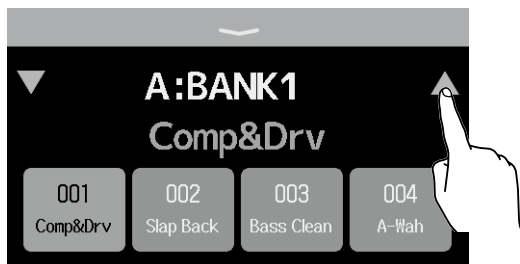

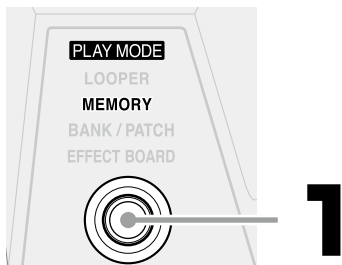

Patch memories can also be selected by swiping the touch-screen up and down.

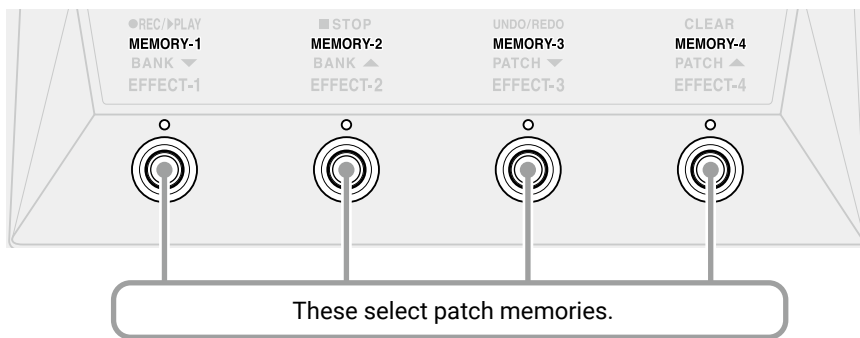

MEMORY

The 4 patch memories in a bank can be shown by name and selected using the footswitches.

Tap ▼ ▲ to select banks.

LOOPER

Played phrases can be recorded to create loops.

Looper settings can be changed by turning the parameter knobs and sliding and tapping icons on the touchscreen.

Using an SD card, loops can be recorded for longer times and saved. Loops on the SD card can also be recalled for playback and overdubbing.

Playing along with a rhythm

Tap **< BACK** to return to the previous screen.

Selecting the DI TYPE

The direct input section of the B6 has four selectable types that reproduce the characteristics of vacuum tube and solid-state DIs.

The DI section affects the output of both the XLR (BALANCED) and AMP OUTPUT jacks.

TUBE-1	Vacuum tube DI character with rich harmonics and thick low frequencies
TUBE-2	Vacuum tube DI character with a clear attack and tight low frequencies
SOLID STATE-1	Solid-state DI character with moderate compression and a sharp tone
SOLID STATE-2	Solid-state DI character with a clear tone and little distortion
Unlit	DI section off

Functions of parts

① **PLAY MODE selection section**

Use this to select the B6 play mode. (The selected mode lights.) Use each mode as needed while playing.

② **Parameter knobs**

Use these to adjust effect parameters and make various settings.

③ **Touchscreen**

Operate the touchscreen to select and set patch memories as well as to make B6 settings, for example.

④ **TAP switch**

Tap this to adjust the tempo.
Press and hold it to use the tuner.

⑤ **INPUT SELECT switch**

Use this to select the input (The selected input lights.)

⑥ **DI TYPE switch**

Use this to select the DI type (The selected type lights.)

⑦ **Footswitches and function indicators**

Use these to select patch memories and banks, turn effects on and off, and operate the looper.
The functions that can be controlled by the footswitches light.

⑧ **BYPASS switch**

Use this to turn bypass on/off and select the bypass type. (The selected setting lights.)

① Output jack section

<p>GROUND CONNECT LIFT</p>	<p>Ground connection can be enabled/disabled for the BALANCED OUTPUT jack.</p> <ul style="list-style-type: none"> CONNECT (■): This connects the ground pin to the ground. LIFT (▲): This disconnects the ground pin from the ground. This is useful if noise is caused by a ground loop.
	<p>BALANCED OUTPUT jack: Connect this to a PA system.</p>
<p>AMP/LINE [PHONES]</p>	<p>AMP/LINE [PHONES] jack: Connect this to a bass amp, monitor speakers or headphones.</p>

② Input jack section

Connect bass guitars here.

	<p>INPUT-1/2 jacks: Connect basses to these.</p>
<p>10M 1M</p>	<p>Impedance selection switches 1/2: Set these to suit connected basses.</p>

③ EXTERNAL LOOP jacks

An external effect can be connected here.

<p>SEND</p>	<p>Connect the SEND jack to the input jack of the external effect.</p>
<p>RETURN</p>	<p>Connect the RETURN jack to the output jack of the external effect.</p>

④ SD card slot

Loading an SD card makes the following possible.

- Loops can be saved and their recording times made longer
 - Impulse response data can be loaded
 - The B6 can be used as a card reader
 - The firmware can be updated
- Cards that conform to SD, SDHC or SDXC specifications are supported.

⑤ POWER switch

This turns the power on/off.

⑥ DC 9V AC adapter connector

Connect the dedicated AC adapter (ZOOM AD-16) here.

⑦ MASTER knob

Use this to adjust the volume of the B6.

⑧ AUX IN jack

Connect a portable music player or similar device here.

⑨ CONTROL IN jack

Connect an expression pedal (ZOOM FP02M) here, and use it to adjust a pedal effect.

⑩ REMOTE connector

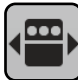

Connect a ZOOM BTA-1 or other dedicated wireless adapter here. This enables wireless control of the B6 from an iPhone/iPad using the iOS/iPadOS Handy Guitar Lab for B6 app.

⑪ USB (Micro-B) port

- Connecting a computer makes the following possible.
- The B6 can be used as an audio interface
 - The B6 can be operated using Guitar Lab
 - The B6 can be used as a card reader

Menu icons

This is a list of the functions shown when Menu Screen icons are touched.

	Adjust effect parameters.		Change the order of effects in patch memories.
	Add effects to patch memories.		Remove effects from patch memories.
	Change effects and amps in patch memories.		Create patch memories.
	Set patch memory names and levels.		Edit all patch memory settings.
	Use the rhythm function.		Make send/return settings.
	Use impulse responses (IR).		Load impulse response (IR) data.
	Create banks.		Change the order of banks.
	Change the order of patch memories.		Delete banks.
	Delete patch memories.		Save patch memories.
	Change and check system settings. Manage SD cards.		Set the tempo used for the effects, rhythms and looper.
	Make USB audio settings.		Turn the automatic saving function on/off.
	Adjust the touchscreen brightness and turn ECO mode on/off.		Make specific tuner settings.

 <p>Use the tuner.</p>	 <p>Set the tone and other characteristics of the output sounds for each input channel.</p>
 <p>Turn the preselect function on/off.</p>	 <p>Show patch memory names in large characters for selection on the touchscreen.</p>
 <p>Show the effects used in the patch memory on the touchscreen.</p>	 <p>Use the footswitches to select the four patch memories in the bank.</p>
 <p>Use the looper.</p>	

Guitar Lab and USB interface functions

The Guitar Lab (computer) and the Handy Guitar Lab for B6 (iOS/iPadOS) apps can be used to manage patch memories and to edit and add effects. The B6 can also be used as a computer audio interface.

Troubleshooting

The unit will not power on

- Confirm that the POWER switch is set to ON.
- Check the connections.

There is no sound or output is very quiet

- Check the connections.
- Confirm that the selected input channel is correct.
- Adjust the levels of the effects.
- Adjust the level of the patch memory.
- Adjust the output volume.
- Turn the tuner off. (The sound will be muted while the tuner is being used.)

There is a lot of noise

- Confirm that a shielded cable is not the cause.
- Use a genuine ZOOM AC adapter.
