Audio interface and control surface

This section explains how to connect the unit with a computer and how to set up and use the audio interface and control surface functions of the R24 with a DAW and other software.

Functions of the audio interface and control surface

Audio interface

The R24 has numerous inputs and outputs and it can be used as a Hi-Speed USB (USB 2.0) audio interface with 8 inputs and 2 outputs at quality up to 24-bit/96 kHz. Effects can be used when the sampling rate is 44.1 kHz, and the unit can be powered by a computer's USB bus.

Control surface functions

On-board control surface functions can be used to control DAW software on a computer via USB. Transport operations, including playback, recording and stopping, and physical control of the DAW faders are possible. Furthermore, various other DAW software functions can be mapped to the F1~F5 keys (assignable functions depend on the DAW used).
■ Multifunction tuner

In addition to standard chromatic tuning, the on-board multifunction tuner also supports 7-string guitar, 5-string bass and various drop tunings.

■ Versatile effect functions

Built-in insert effects can be applied to specific channel paths, and two-types of send/return effects work via the mixer send/return. These effects can be applied when recording, of course, but they can also be applied to only the monitor output. For example, when recording vocals, you can apply reverb only to the monitor signal to make singing easier.

■ Comprehensive built-in mixer

Using the R24’s mixer, you can make a mix for monitoring. When simultaneously recording guitar and vocals, for example, you can adjust volume balance, panning and reverb levels. Moreover, you can also adjust the balance between the built-in mixer and the sound sent from a computer.

■ Supports input from a variety of sources, including guitars, mics and line level instruments

The 8 onboard jacks accept XLR and standard phone plugs and include one high-impedance input and two inputs with phantom power (24V or 48V). Many sources are supported from high-impedance guitars and basses to dynamic and condenser microphones and line-level devices like synthesizers. In addition, built-in high-performance condenser microphones are convenient for recording acoustic guitars and vocals.
R24 Audio Interface system requirements

### Windows
Windows® 7 (32-bit, 64-bit) or later
32-bit: Intel® Pentium® 4 1.8 GHz or faster
64-bit: Intel® Pentium® Dual Core 2.7 GHz or faster
32-bit: RAM 1 GB or faster
64-bit: RAM 2 GB or faster

### Intel Mac
OS X 10.9 or later
Intel® Core Duo 1.83 GHz or faster
RAM 1 GB or faster

### Both
USB 2.0 compatible port
- USB hubs are not supported.
- Intel® chipsets recommended.

**Note about descriptions and images**
This manual was prepared based on use with Windows systems. Special functions related to Mac OS X are indicated separately.

The screen images are of the Windows version.

Connecting and disconnecting in audio interface mode

This is an overview of connecting and disconnecting the R24 to a computer with a USB cable. For details, see the included “Cubase LE Startup Guide”.

Connecting the R24 to a computer for the first time

1. Install the Cubase LE DAW software on the computer.
2. Install the audio driver on the computer.
3. Connect the R24 to a computer.
4. Setup the DAW software.

R24 setup and connection

Follow these procedures when connecting again.

1. Press USB.
2. Select AUDIO I/F.
   - Press ENTER.
3. Select EXECUTE.
   - Press ENTER.

NOTE

- The ZOOM R16/R24 audio driver is essential for using the R24 as an audio interface with DAW software such as Cubase LE. When downloading it, follow the included installation guide to install it correctly.
- Download the latest R24 audio driver from the Zoom Corporation website. http://www.zoom.co.jp/
Audio interface manual

• The audio interface and control surface functions of the R24 can be used by drawing power through a USB cable from the USB bus.
• We recommend always using the latest R24 system software.
• When using phantom power, we recommend using batteries or an AC adapter even when the unit is used as an audio interface.

**NOTE**
Select CONTINUE to use the same settings as last time.
- INSERT EFFECT settings
- SEND RETURN EFFECT settings
- Mixer settings
- TUNER settings
Select RESET to restore default settings for each item.
Using control surface functions

When using the R24 connected by USB as an audio interface, the R24 keys and faders can be used to control Cubase LE’s transport and mixer.

**About the control surface**

In control surface mode the keys and knobs on the R24 can be assigned to particular Cubase LE functions.

**Control surface setup**

See R24 setup and connection steps 1–5 on P5–6

Then, launch Cubase LE.

From the Cubase LE “Devices” menu, select “Device setup…”

At the top left of the Device setup window [+], [−] and [|<] buttons appear. Click the [+], and select “Mackie Control”

Set the MIDI input and output

MIDI input: ZOOM R16_R24
MIDI output: ZOOM R16_R24

**HINT**

Assigning keys

For a list of functions that can be assigned to the knobs and keys of the R24, as well as other transport/function keys that are supported by Cubase LE, please consult the “Control surface functions quick reference guide” in this manual.

The display of MENU etc. may be different depending on the version of Cubase LE. Please refer to your Cubase LE manual.
Transport section

By setting up the control surface, the R24’s transport section keys can be assigned to individual functions in Cubase LE.
Fader section operation

Using the faders and status keys of the fader section, you can adjust the volume of corresponding Cubase LE tracks, mute and solo them, and arm them for recording.

About banks

After setting up control surface operation, the main parameters of Cubase LE can be operated using the R24’s fader and status keys.

A group of tracks operated by the faders and status keys is called a “bank.” With the R24, one bank of 8 adjacent tracks can be controlled. For example, if fader 1 is assigned to Cubase LE track 1, tracks 1-8 can be controlled as shown in the following diagram.

<table>
<thead>
<tr>
<th>Control</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
</tr>
</thead>
<tbody>
<tr>
<td>Track</td>
<td>Tr.1</td>
<td>Tr.2</td>
<td>Tr.3</td>
<td>Tr.4</td>
<td>Tr.5</td>
<td>Tr.6</td>
<td>Tr.7</td>
<td>Tr.8</td>
</tr>
</tbody>
</table>

As the diagram shows, when tracks 1~8 are selected, pressing the [9~16tr (Bank>)] key once switches the assignments as shown below.

<table>
<thead>
<tr>
<th>Control</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
</tr>
</thead>
<tbody>
<tr>
<td>Track</td>
<td>Tr.9</td>
<td>Tr.10</td>
<td>Tr.11</td>
<td>Tr.12</td>
<td>Tr.13</td>
<td>Tr.14</td>
<td>Tr.15</td>
<td>Tr.16</td>
</tr>
</tbody>
</table>

1~8Tr (< BANK) key
Tracks (channels) assigned to the fader section are moved backward by eight tracks.

9~16Tr (BANK >) key
Tracks (channels) assigned to the fader section are moved forward by eight tracks.

Operating the fader section

1. Assign the Cubase LE tracks (channels) that you want to control to the fader section.

2. Use the faders to control the volumes of the corresponding tracks.

   The faders control the volumes of their respective tracks. Change the master volume by moving the [Master] Fader.

3. To change the function of the status keys for all the tracks, press the soft key for the desired function.
R24 level meters  
(Audio interface use)

| ← | ← | ← |
| ← | ← | ← |
| ← | ← | ← |
| ← | ← | ← |

| ← | ← | ← |
| ← | ← | ← |
| ← | ← | ← |
| ← | ← | ← |

1 / 9 / 17  
8 / 16 / 24  

Each level meter other than the MASTER displays the signal immediately before sending it to the computer.

The master level meter displays the returning signal from the computer.

Checking DAW recording levels

Set “REC SIGNAL” (in the INSERT EFFECT menu) to “WET” (signal with effect) or “DRY” (no effect) to send signals to the computer with or without being processed by the insert effects. The recording levels of the sent signals are displayed on the level meters. The signal shown on the master level meter differs from that shown on each level meter.

| ← | ← | ← |
| ← | ← | ← |
| ← | ← | ← |
| ← | ← | ← |

Red light (clipping)  

Adjust the levels so that the red (0 dB) clipping indicators on the meters do not light.
Setting the function keys

The five keys above the transport keys can be used as function keys (F1~F5) and assigned as desired.

1. Open the “Device setup…” dialog in Cubase LE.

2. Select “Mackie Control”.
   Commands can be assigned using the three columns displayed on the right side of the window.

3. From the “Button” column choose the function key (F1~F5) to be assigned a Cubase LE function.

4. Click on the “Category” column for that control.

5. Choose the type of Cubase LE function from the Category pop-up menu.

6. Click on the “Command” column and select the desired Cubase LE function from the pop-up menu.
   The items in this pop-up menu will differ depending on the category chosen.

7. Press the “Apply” button.

HINT
The display of MENU etc. may be different depending on the version of Cubase LE. Please refer to your Cubase LE manual.

The mixer in audio interface mode

In audio interface mode you can make a mix for monitoring using the R24’s internal mixer. In addition, you can adjust the balance of the internal mixer and the sound from the computer.

### Volume, reverb send, pan

You can be adjust the reverb send, pan, volume and stereo link settings as in recorder mode.

Operation is the same as in recorder mode.

(Reference: OPERATION MANUAL)

#### PAN/EQ menu

**VOLUME**

Adjust the volumes of INPUTS 1~8.

- **PAN**
  - L100
- **REV SEND**
  - Off
- **VOLUME**
  - 0
- **ST LINK**
  - Off

- **REV SEND**
  - Adjust the reverb send levels of INPUTS 1~8.

<table>
<thead>
<tr>
<th>Input1/2</th>
<th>PAN</th>
<th>REV SEND</th>
<th>VOLUME</th>
<th>ST LINK</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>L100</td>
<td>Off</td>
<td>0</td>
<td>Off</td>
</tr>
</tbody>
</table>

- **PAN (BALANCE)**
  - Adjust the pan for INPUTS 1~8.

<table>
<thead>
<tr>
<th>Input1/2</th>
<th>PAN</th>
<th>REV SEND</th>
<th>VOLUME</th>
<th>ST LINK</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>L100</td>
<td>Off</td>
<td>0</td>
<td>Off</td>
</tr>
</tbody>
</table>

### Stereo link

Link even and odd numbered INPUTS to handle them as stereo pairs.

### Balance knob

In audio interface mode, the balance of the input monitoring signal and the signal from DAW software (the computer) can be adjusted with the **BALANCE** knob.

- **Left**
  - Only the INPUT 1~8 signals
- **Right**
  - Only the DAW stereo signal

### Note

The reverb send, pan, volume and stereo link settings are all saved when you terminate (EXIT) audio interface mode and can be used again the next time.
The R24 tuner can be used as when recording. For details, see the Operation Manual.

**Chromatic tuner**

TOOL > TUNER

1. Press TOOL.
2. Select TUNER.
3. Press ENTER.
4. Tune the instrument.
5. Select the standard pitch.
6. Press ENTER.

**HINT**

- The default value of the standard pitch is 440 Hz.
- Tuners other than the chromatic tuner can also be used. Reference: Operation Manual

**NOTE**

Tuner settings are saved when you terminate (EXIT) audio interface mode and can be used again the next time.

Reference: Operation Manual

Tuner

**Change the standard pitch**

- Press the button beneath **CALIB**.

**Change the tuner type**

- Press the button beneath **TYPE**.

Reference: Operation Manual

**Tuner settings**

- **TOOL**
- **SYSTEM**
- **ENTRY**: Press ENTER.
Effects in audio interface mode

The R24’s insert and send-return effects can both be used when the sampling frequency is set to 44.1 kHz. Basic operation is the same but there are a few differences in the menus.

Insert effect

As in recording mode, you can select the insert location and the insert effect algorithm, as well as the effect patches to be applied to the signal being recorded.

Send return effect

As in recorder mode, use the SEND REVERB menu to change the patch and use the PAN/EQ menu to set the REV SEND level that adjusts the reverb depth.

NOTE

• Effects can only be used when the sampling rate is 44.1 kHz. At all other times it is turned OFF.
• Insert and send return effect settings are saved when you terminate (EXIT) audio interface mode and can be used again the next time.
Working with patches

After making many changes, you can restore a patch to its pre-edited settings by initializing it. This will return it to its factory preset condition.

Patch operations
For both insert and send return effects

Selecting insert effect/reverb patches
To use an insert effect, select an algorithm and a patch.
To use a send reverb effect, select a patch.
(Reference: Operation Manual)

Editing patches (EDIT)
By adjusting effect module parameters and levels, you can create the desired result. (Reference: Operation Manual)

Importing patches (IMPORT)
All effect algorithms (and reverb patches) or a single one can be imported from a selected project on the R24.
(Reference: Operation Manual)

In audio interface mode, one complete set of effect data is saved for the mode. There are no project based settings.

Saving patches (SAVE)
Edited patches can be saved.
(Reference: Operation Manual)

Initializing patches (INITIAL)
Restores patches to their original factory settings (only available in audio interface mode).

Changing patch names (RENAME)
The name of the currently selected patch can be changed.

Patch initialization (factory reset)
EFFECT > INITIAL

1. Press EFFECT.

2. Select INITIAL.

3. Press ENTER.

4. Select YES.

Press ENTER.
Cubase LE  Startup Guide

1. Install Cubase LE referring to the bundled ‘Download access code sheet’.  
2. Download the latest driver from ZOOM website (www.zoom.co.jp) and install it.  
3. Connect the ZOOM unit to the computer. Please refer to Operation Manual how to connect.  
4. Startup Cubase LE, select “Device Setup...” from the “Devices” menu, and click “VST audio system” in the Devices Column. Select the downloaded driver or the devices including the ZOOM model names here. e.g. H Series Multi Track is shown as following.  
5. Select “VST Connections” from “Devices” menu and set the input and output device ports to the downloaded driver or the devices including the ZOOM model names. For multi-track supported models, click “Add Bus” and add the input bus. e.g. H Series Multi Track is shown as following.  

6. Select “New Project” from the “File” menu. “Project Assistant” window opens in order to select a project template. Click “More”, select “Empty”, and then click the “Create” button to display the project window.  
7. Select “Add Track”->“Audio” from “Project” menu and add new audio track.  
8. Click “Record” button on the Transport panel and start recording. Recording starts. Click “Stop” button to stop recording.  
9. Click “Play” button to check the recording.  

This is all for the basic setting. For more information, please refer to the Documentation from "Help" in Cubase LE or visit Steinberg website (www.steinberg.net/en/home). The Menu items are subject to change. Please refer to the Cubase LE Operation Manual in such cases.
