This guide explains firmware update to v1.11 as an example.

1. Installing the firmware update file

Download the ZIP file containing the firmware update file from G11 download page.

For Windows

2. Extracting the ZIP file

Select the folder where you downloaded the ZIP file. ① Click "Compressed Folder Tools", then ② "Extract All". The ZIP file will be extracted.

3. Copying the firmware update file to the USB flash drive

Copy the "G11.ZUF" file to the USB flash drive.

For Mac

2. Opening the downloaded file

After downloading, click "Downloads" displayed at the bottom of the screen. Then click ② to open the downloaded file.

3. Copying the firmware update file to the USB flash drive

Copy the "G11.ZUF" file to the USB flash drive.

The following is the same procedure for Windows and Mac.

4. Connect the USB flash drive to the G11's USB HOST terminal.

5. While pressing and holding the 2 foot switches, set  to on. Press and hold the 2 foot switches until "Starting..." is displayed on the screen.

[NOTE]

Do not turn the power off or remove the USB flash drive during a firmware update. Doing so could cause the G11 to become unstartable.

6. After the firmware update completes, turn the  off.

[NOTE]

In the unlikely event that the firmware update should fail, follow the procedures from the beginning again to update the firmware.
