## H4essential Firmware Update Guide

Copyright(C) 2024 ZOOM CORPORATION. All Rights Reserved. Proper display is not possible on grayscale devices.

### Introduction

#### ■Item to prepare

H4essential

USB Type-C cable

Windows or macOS computer with Internet access

microSD card

Supported recording media microSDHC: 4 GB – 32 GB microSDXC: 64 GB – 1 TB

Always format microSD cards on the H4essential after purchasing them new or using them with a different device.

#### \_

- ■Firmware update process
- 1. Download the firmware update file.
- 2. Extract the ZIP file.
- 3. Copy the extracted firmware update file to a microSD card.
- 4. Update the firmware.
- 5. Confirm that the firmware has been updated correctly.

## **Updating the Firmware**

#### This guide explains firmware update to version 1.10 as an example.

1. Download the firmware update file.

Download the ZIP file that contains the firmware update file from the H4essential download page.

### **On Windows**

#### 2. Extract the ZIP file

Select the folder that contains the downloaded ZIP file. Click ①"Compressed Folder Tools" and then click ②"Extract all". This extracts the ZIP file.

**3.** Copy the firmware update file to a microSD card. Copy the "H4essential.BIN" file to a microSD card.

Firmware update file

Copy the firmware update file to a microSD card.

### On macOS

**2.** Extract the ZIP file.

After downloading, open the 1 "Downloads" folder which appears at the right end of the Dock by default. Then, click 2. Downloaded files will be shown.

**3.** Copy the firmware update file to a microSD card. Copy the "H4essential.BIN" file to a microSD card.

Firmware update file

Copy the firmware update file to a microSD card.

### The following procedures are the same on both Windows and macOS.

Connect the power source (AC adapter, USB bus power or portable battery) to the USB port (Type-C) of H4essential.
<u>NOTE</u>

• When performing a firmware update using batteries, the update may not be possible depending on the remaining battery charge.

5. Insert the microSD card into the H4essential.

|--|

This turns the H4essential power on and opens the Home Screen on the display.

10.	Use to select "Execute" and press .
	⇒ Firmware
	Firmware Update 1.00 -> 1.10 Execute
11.	Slide toward U until "Goodbye See You!" appears on the display.

Slide  $\bigcirc$  HOLD toward  $\bigcirc$  until "Goodbye See You!" appears on the display.

The display will become empty, and the power will turn off.

## 12. Slide $\bigcirc$ HOLD toward $\bigcirc$ again.

The update will be executed automatically, and the REC indicator will blink slowly.

After about 1 minute, a completion screen will appear.

#### **NOTE**

During the firmware update, do not turn the power off or remove the microSD card.

If the update fails, the REC indicator will blink rapidly. If this happens, turn the power off once and confirm that the microSD card is loaded correctly. Then, turn the power on and try updating again.

#### **13.** Turn the power off.

#### **NOTE**

If the firmware update failed, starting the unit might not be possible and the REC indicator might stay lit. Turn the power off and repeat the steps from the beginning.

## Confirming that the firmware has been updated correctly

Check the firmware versions used by the H4essential.

- 1. On the Home Screen, use to select to select and press . This opens the System Settings Screen.
- 2. Use to select "Firmware" and press to confirm.
